

GO-TO-MARKET

Market & Campaign Report

Where this sells, at what price, and the plan to launch it

The short version

There are four real markets for this product, in order of how proven and how well-matched they are to Kevin:

1. Erasmus+ KA1 teacher training — teachers attend PD abroad, 100% funded by the EU. This is where Kevin's course was born. Strongest fit, real money, warm relationships already exist (GEC Academy).
2. Dutch funded in-school PD — study days and professionalisering, paid from CmK cultuurgeld and the structural basisvaardigheden / digitale-geletterdheid budgets. Kevin is already inside this world through the school campaigns.
3. Self-hosted course sales — sell the download from kevinstorm.eu with a simple checkout. Best margin, full control, compounds over time.
4. Teacher-material marketplaces — TPT / Gumroad style. Proven but crowded; best used as a lead-generator and credibility signal, not the main income.

The plan below builds a funnel that feeds all four from one landing page: kevinstorm.eu/curriculum.

Market 1 · Erasmus+ KA1 (best fit)

Proof it pays. EU teachers get 100% funding to attend PD abroad; providers charge a course fee per participant per week (commonly around €400-500, sometimes bundled higher with accommodation). Providers such as Europass Teacher Academy run 450+ courses; the demand is structural and recurring.

(erasmustrainingcourses.com · teacheracademy.eu)

How to enter.

- Fastest: deliver through an existing accredited provider (Kevin already has GEC Academy). Offer them this ready-made course to add to their catalogue, co-branded. They handle funding admin and recruitment; Kevin delivers and/or licenses.
 - Bigger later: list courses on the European School Education Platform and build direct provider relationships (iDevelop, Teacher Academy, Primera, Teachersrise, Erasmus Learning Academy).
- Price. €320-400 per participant per delivered week, or a licence fee to the provider (see pricing). Verdict: highest-value, warmest, do first.
-

Market 2 · Dutch funded in-school PD

Proof it pays. Schools already buy study days and professionalising from external experts, funded by CmK (Cultuureducatie met Kwaliteit), and from the structural basisvaardigheden money that explicitly covers **digitale geletterdheid** (structural for every school from 2027). Kevin already has live, warm leads here (SWV's, Agora schools, Cultuur Oost, OOE team-training). How to enter. Sell the flagship or a subsection as a study-day package to the schools, boards and SWV's already in the outreach pipeline. The materials make one trainer look like a whole institute. Price. €2,400-3,600 per group for a live day/two-day; or a school licence (€549 full / €249 subsection) for self-run use. Verdict: strong, already in motion, sell it into the existing campaign.

Market 3 · Self-hosted course sales

Proof it pays. The online-course market is mature; the winning move for an expert with an audience is to self-host (Teachable/Thinkific/Plug&Pay/Copecart or a simple Gumroad/Payhip checkout) and keep the margin, using marketplaces only for discovery.

([learnworlds.com guide](#))

How to enter. Put the download on [kevinstorm.eu/curriculum](#) with a checkout. Start with one price, add the bundle and school licence, then a subscription or cohort later.

Price. €149 full / €59 subsection / €199 bundle (self-paced). Verdict: best margin and it compounds; build the page now, it underpins everything.

Market 4 · Teacher-material marketplaces

Proof it pays — with a caveat. Teachers Pay Teachers paid sellers an estimated \$253M in 2024 across ~233k active sellers, but earnings are very uneven (most sellers earn little; the top 1% average ~\$6,300/month).

([Wikipedia](#) · [income breakdown](#))

How to use it. Not as the main income. List a few small, cheap resources (a "6 levers" poster, an AI-prompt pack, a Delightex starter brief) that are useful alone and advertise the full course. It is a discovery and credibility

channel that points back to kevinstorm.eu.

Price. €3-12 per resource. Verdict: lead-gen and proof, low effort, do after the landing page is live.

Positioning & differentiators

- Proven, not theoretical — delivered to international teacher groups.
 - They leave with a finished thing — one real, playable lesson.
 - AI + game design together — exactly what schools ask for now.
 - Inclusion / special needs — genuinely rare; Kevin's signature and a moat.
 - The touring maker — a working musician who builds from the road. Nobody else in this market has that story; it is marketing gold.
-

The funnel

One landing page, four markets, a clear ladder from free to high-value:

- Free lead magnet — "The 6 Levers of Engagement" one-pager + a starter AI-prompt pack. Collect emails.
- Tripwire — a subsection (AI in Education) at €59 to turn a follower into a first-time buyer.
- Core — the full course (€149) or a live study day (€2,400+).
- High-value — school licence, provider licence, live Erasmus delivery.

kevinstorm.eu/curriculum is the hub; every channel points to it.

90-day campaign plan

Phase 1 (weeks 1-3) · Build the shopfront

- Publish the expanded kevinstorm.eu/curriculum section (design supplied).
- Set up a simple checkout (Gumroad/Payhip/Plug&Pay) for the download products.
- Ship the free lead magnet and start collecting emails.
- Finish the branded PDFs (done) and record a 2-minute intro video.

Phase 2 (weeks 3-6) · Warm sales first

- Pitch GEC Academy (Aylin) the ready-made 2026 course for their catalogue.
- Offer the study-day package to the warm school/SWV/Agora leads already in the pipeline (bundle it with the team-trainings already in motion, e.g. OOE).
- Approach 3-5 more Erasmus+ providers with the course one-pager.

Phase 3 (weeks 6-10) · Content engine

- Start the "onderwijs vanuit de tourbus" LinkedIn thread: short, honest posts on building gamified lessons on the road, each ending at the landing page.
- Publish 3-4 marketplace resources (TPT/Gumroad) that point back to the course.
- Ask early participants for testimonials; put them on the page.

Phase 4 (weeks 10-13) · Scale what works

- Double down on the channel that sold: providers, schools, or direct.
- Add the bundle and school-licence offers prominently.
- Plan the online 4×half-day cohort as a recurring, low-effort revenue line.

KPIs to watch

- Emails collected (lead magnet).
- First-sale conversion (tripwire).
- Provider/school conversations booked and closed.
- Revenue by market (so you know where to lean).

First five actions (do these first)

1. Publish the kevinstorm.eu/curriculum expansion (HTML supplied).
2. Put the full course + subsections on a checkout link.
3. Email GEC Academy offering the 2026 course for their catalogue.
4. Offer a study day to the warmest school/SWV lead in the pipeline.
5. Post the first "tourbus" LinkedIn piece with the lead magnet.

NOTE

Honest expectation-setting: marketplaces and self-hosted sales build slowly and compound. The fast money is Markets 1 and 2 — funded delivery through providers and schools — because the budget already exists and Kevin already has the relationships. Lead with those; let the digital products compound underneath.
